

2021 Pavement Management Report

APPENDIX C – CITY STREET LISTINGS,
ALPHABETICAL AND RATING (PCI)

October 2021

WR Job Number: 06210273.00 || Prepared for the City of Albemarle, NC

Steve Lander, PE

2021 Pavement Management Report

LEGEND AND STREET LISTINGS FOR APPENDIX B

INVENTORY:

D Direction. This should be shown when a street has a designated direction as part of its street name, such as North Main Street or South Elm Street. One of the following letters is used to designate the directions:

N - North	E - East
S - South	W - West

STREET The name of the street as shown.

TP Street type. This designates a section of a street, boulevard, avenue, etc. The following standard abbreviations are used:

BEG DESC Begin description. This is the description of the beginning point of the street section. Most commonly, this is an intersection with another street.

If the section begins at a point other than an intersection, the begin point is described using the standard descriptions shown below:

Dead End	Private Prop
Beg Pvmt	Beg Median
End Pvmt	End Median
Cul de sac	Beg C&G
City Limit	End C&G
End Maint	Beg Concrete
R/R Trks	End Concrete
Chg Pvmt	Bridge

Other descriptions are used as needed.

END DESC End description. This describes the location where the segment ends. Again, this would generally be an intersection with another street. It should be completed as described under BEG DESC.

LEN Length of the street segment measured in feet.
Note: Measurements based on GIS centerline data.

P Pavement surface type. This describes the type of pavement surface that exists on the section. The type is filled in as shown below:

P - Plant Mix Surface (PM)	CP - Composite Pavement
B - Bituminous Surface Treatment (BST)	U - Unpaved
C - Portland Cement Concrete Pavement (PCC)	D - Brick

The survey only evaluates streets with plant mix surfaces and bituminous surface treatments.

L Number of travel lanes. This is the number of through travel lanes that exist on the segment or the majority of the segment.

CL Class of street. Sections are classified according to traffic usage.

A - Low Volume, residential street
B - High Volume, arterial/collector streets

WI Pavement width. This is the width of the section measured in feet from edge of pavement to edge of pavement.

DISTRESS:

FC Fatigue Cracking

Severity: None, Low, Medium, and High

Extent: 0-5%, 5-10%, 10-25%, 25-50%, 50-75%, and 75-100%

TC Transverse Cracking

Severity: None, Low, Medium, and High

Extent: Low (>100'), Medium (100'-50'), High (50'-25'), Extreme (<25')

BC Block Cracking

Severity: None, Low, Medium, and High

Extent: 0-5%, 5-10%, 10-25%, 25-50%, 50-75%, and 75-100%

PP	Patching/Potholes Severity: None, Low, Medium, and High Extent: 0-5%, 5-10%, 10-25%, 25-50%, 50-75%, and 75-100%
SD	Oxidation/Raveling – Surface Defects Severity: None, Low, Medium, and High Extent: Low (<25%), Medium (25-50%), High (50-75%), Extreme (75-100%)
RR	Rutting/Roughness Severity: None, Low, Medium, and High Extent: Low (<25%), Medium (25-50%), High (50-75%), Extreme (75-100%)
RC	Reflective Cracking Severity: None, Low, Medium, and High Extent: Low (>100'), Medium (100'-50'), High (50'-25'), Extreme (<25')

RESULTS:

PCI	Pavement Condition Index. A rating on a scale of 0 to 100 with 100 being the best.
SEG SY	Total area of the segment in square yards.
TREATMENT	Maintenance activity required.
PROJECT PRICE	Total cost of Treatment for that street section. Secondary maintenance costs are included in this Treatment.
